ANTICIPATED START DATE OF CONSTRUCTION: _____

Qualified Contractor: _____

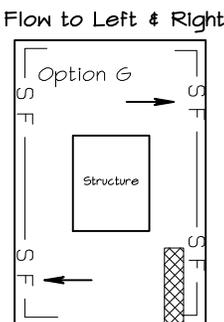

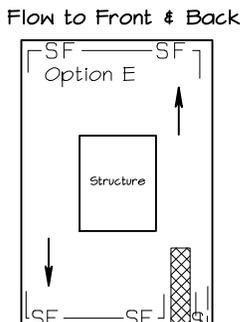

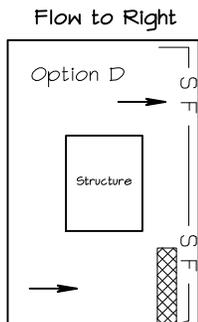

EPSC OPTIONS

INSTRUCTIONS: Identify one or any combination of letters for the EPSC schematic that best describes the measures that will be used on this property during construction.

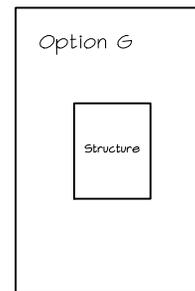

Legend

- SF— Silt fence or straw wattle
- ▣ Stabilized Construction Entrance
- Direction of Flow (point downhill)

For Option G, show flow lines and proposed EPSC measures.

STANDARD CONDITIONS

The applicant will comply with the following conditions:

1. EPSC must be installed to prevent off-site sedimentation.
2. Perimeter controls shall be in place prior to beginning construction
3. All EPSC measures shall be installed and maintained as specified in the City of Shelbyville's BMP Manual.
4. The contractor shall be responsible for keeping streets, drainage structures, streams and other properties free of sediment and other construction materials generated by this project.
5. Areas at final grade must be seeded and stabilized within 14 days. Disturbed areas not at final grade must be stabilized within 21 days.
6. Upon final stabilization (with at least 80% coverage), EPSC measures must be removed.

The undersigned hereby certifies that he/she will follow the Plot Plan EPSC Plan as described above and will protect all storm drainage structures on this lot. Furthermore, the undersigned will fully comply with the specifications in the City of Shelbyville's BMP Manual and Storm Water Ordinances. The undersigned will take all necessary actions to prevent off-site sedimentation from occurring. Once the building permit is issued, this document becomes an enforceable EPSC plan for the project site.
